OBJECTIVE

Computer Engineering undergraduate (Class of 2028) with **strong analytical and problem-solving foundations** in **Data Structures & Algorithms**, and hands-on experience building **secure, full-stack applications**. Proven ability to **take ownership of complex technical problems** under pressure, demonstrated through a **state-level hackathon win**. Comfortable navigating **ambiguous, undefined problems** and communicating technical trade-offs clearly. Seeking to apply **rigorous engineering thinking** and a **fast-learning mindset** to real-world technology challenges as a **Summer Analyst**.

TECHNICAL SKILLS

- **Core CS & Problem Solving:** Data Structures & Algorithms (Java), Object-Oriented Programming, Time/Space Complexity Analysis
- **Problem Solving Practice:** Regularly solve DSA problems across multiple platforms (LeetCode, GeeksforGeeks, HackerRank), covering Arrays, Strings, Recursion, Trees, and Dynamic Programming
- **Programming Languages:** Java, C++, Python, JavaScript
- **Web Technologies:** React.js, Next.js 14, Tailwind CSS, HTML5, CSS3, Ethers.js
- **Databases:** Firebase (Firestore), SQL fundamentals
- **Concepts:** API Integration, Async Programming, State Management, Cryptographic Security (ECDSA, Keccak-256)
- **Tools:** Git, GitHub, VS Code, Vercel

PROJECTS

VoteChainX | Decentralized E-Voting System (Winning Project)

- Architected a secure voting platform using Solidity, Next.js 14, Firebase, and Ethers.js, facilitating transparent interactions with the Ethereum blockchain and real-time data sync.
- Implemented a gasless meta-transaction relayer (EIP-2771) and an offline-first sync mechanism to eliminate user costs and ensure data reliability in intermittent networks.
- Integrated OpenZeppelin's ReentrancyGuard, ECDSA signatures, and Keccak-256 hashing to prevent double-voting and guarantee end-to-end voter anonymity.
- Presented the architecture and live demo to judges and 96 competing teams, articulating technical trade-offs under time constraints.

EDUCATION

- **MET's Institute of Engineering, Nashik | Computer Engineering** 2024–2028 (Pursuing) 8.28 CGPA
- 12th (HSC) | D.D.S.P College, Erandol, Dist. Jalgaon 80.17% | 2024
- 10th (SSC) | R. T. Kabre, Erandol, Dist. Jalgaon 85.40% | 2022

CERTIFICATIONS

- **Apna College Certificate:** Data Structures and Algorithms with Java (2025)
- **Apna College Certificate:** Full Stack Web Development (2026)

ACHIEVEMENTS

Winner (1st Place) — upXgen State Level Hackathon

- Secured 1st Rank among 96+ competing teams across Maharashtra in the Blockchain track, engineering VoteChainX, a decentralized infrastructure featuring an innovative gasless meta-transaction model and high-grade cryptographic security.

Elite Certification — NPTEL (IIT Kharagpur), Programming in Java

- Scored 92% (Elite) among 19,306+ candidates nationwide, demonstrating strong Java and OOP fundamentals via a proctored IIT Kharagpur exam.
